EXPRESS WEBSITE AUDIT · FREE | SCANNED: 27 OCT 2026 16:17 UTC | LOCALE: EN

erythro.ai

Overall score

5 CHECKS · HOMEPAGE

87 /100

Score 87 out of 100 — from an express check of the homepage. The weakest scale is “Speed & Mobile UX” (66). This report opens 5 core checks and Google Lighthouse; a full audit (28 checks, 3 locales, up to 10 pages) may refine the score.

Top 3 conversion vulnerabilities & missed revenue

The three problems that hurt lead volume and cost per lead the most.

01 Accelerate Core Web Vitals and mobile LCP

CONVERSION VULNERABILITY | NEEDS ATTENTION

PROBLEM	Even with good averages, mobile LCP and INP can reach 1.5s and 200ms targets.
BUSINESS LOSS	Each +100ms delay lowers conversion and raises cost per lead.
ERYTHRO.AI SOLUTION	**Ready solution with code — Step 1 of the action plan ↓**

02 AI qualification of inbound leads

CONVERSION POTENTIAL | GROWTH OPPORTUNITY

PROBLEM	Leads handled manually without auto-qualification and routing.
BUSINESS LOSS	First response time grows; leads lost between email and CRM.
ERYTHRO.AI SOLUTION	Solution and code are in Pro. **Compare tiers ↓**

03 Expand multilingual funnel

CONVERSION POTENTIAL | GROWTH OPPORTUNITY

PROBLEM	Locales work but lack per-market nurture flows and landings.
BUSINESS LOSS	One offer for all markets converts worse than localized journeys.
ERYTHRO.AI SOLUTION	Solution and code are in Pro. **Compare tiers ↓**

Open Graph

Lead path

OPERATIONAL

Verdict: visitors can leave a lead on the homepage — there is a form and an instant contact channel.

LEAD CHANNELS	WHAT THE AUDITOR CHECKS		BUSINESS RESULT
On-page form	HTTP 200, no soft-404	1/1	✓ No lead lost between the click and the form
Form on button click →	CTA or form on page	1/1	✓ Spam is filtered out before it reaches the CRM →
	Anti-spam: Turnstile, honeypot, reCAPTCHA	OK	✓ Messenger visitors get a reply within seconds
Telegram	Instant contact channel	OK	✓ The menu only links to live URLs

Lead path across the whole funnel (up to 10 pages)

End-to-end checkout verification, soft-404 detection, and lead capture form testing across all catalog pages is available in Diagnostic and Pro.

What Diagnostic and Pro include ↓

How we count the lead path: an embedded form, a form opened by a button (Let's Talk), chat and messengers. A button without a form is a CTA, not a funnel gap, if the click opens a form or WhatsApp.

Recommended actions

Fix order: work from top to bottom, from the most urgent to the least. The color shows urgency and matches the statuses in the checklist.

Critical — fix first Needs attention — plan it Growth — when possible

Accelerate Core Web Vitals and mobile LCP

STEP 1

SPEED NEEDS ATTENTION

Each +100ms delay lowers conversion and raises cost per lead. Next-gen images, critical CSS and CDN caching by Erythro.ai.

Image markup and static file cache

```
<!-- Modern formats with a JPEG fallback and fixed dimensions (no layout shift): -->
<picture>
  <source srcset="/images/hero.avif" type="image/avif">
  <source srcset="/images/hero.webp" type="image/webp">
  <img src="/images/hero.jpg" width="1200" height="630" alt="Banner description" fetchpriority="high">
</picture>
<!-- HTTP header for images, CSS and JS (server or CDN):
     Cache-Control: public, max-age=31536000, immutable -->
```

Full audit checklist

RESULTS: 5 OF 28

GROWTH OPPORTUNITY

Lead forms, anti-spam & instant response

CHECK RESULT

Forms: 1. Email: no, phone: no, submit: yes. Anti-spam: Cloudflare Turnstile, Honeypot. Instant channel: WhatsApp/Telegram (1)

RECOMMENDATION

The form is protected but lacks an email or phone field, or a submit button. Add a contact field and a clear submit button, otherwise there is nothing to follow up.

EXCELLENT

Horizontal overflow (Overflow-X at 375px mobile)

CHECK RESULT

Fits smartphone viewport (0px overflow)

RECOMMENDATION

Overflow-X is clean: 0px at 375px (iPhone SE).

Lock a 375–430px grid regression in releases so blocks, sliders and absolute layers stay inside the viewport. Re-measure on every locale.

EXCELLENT

GA4 / dataLayer readiness

CHECK RESULT

dataLayer + consent stub in head (GA4 G- ID found)

RECOMMENDATION

dataLayer and the Consent Mode stub are already in <head>. Do not move gtag('consent','default') below the cookie banner — Google will miss consent.

EXCELLENT

HTTPS & security HTTP headers

CHECK RESULT

HTTPS active; headers 6/6

RECOMMENDATION

HTTPS and security headers are in place. Do not drop HSTS, CSP, X-Frame-Options, X-Content-Type-Options, Referrer-Policy or Permissions-Policy on deploy.

EXCELLENT

Runtime stability (JS errors & failed requests)

CHECK RESULT

No JS crashes or 4xx/5xx responses recorded

RECOMMENDATION

Runtime is stable: no PageError or 4xx/5xx on visited URLs.

Keep console / PageError monitoring on the funnel so a regression never hits paid traffic.

The other 23 checks — in Diagnostic (summary) and Pro (row by row, with recommendations)

The express version opens 5 core homepage checks. Paid tiers check the site in three languages, including:

- Security stress-test & HTTP headers (HSTS, CSP, CORS)
- Anti-spam bot protection & CRM lead deliverability
- Multilingual hreflang & RTL layout verification
- AI search indexing (ChatGPT, Perplexity, Claude)
- Runtime stability, TTFB and server response

What Diagnostic and Pro include ↓

Audit protocol

The Erythro.ai lab checked the erythro.ai homepage in the EN locale on mobile (iPhone SE 375×667) and desktop.
